NOW FOR PEACE.

The fall of the capital of the Southern Confederacy renders this, of all others, the time for the sake of peace to act as statesmen and patriots. If, even now, the one main central, controlling idea of a restoration of the Union under the Constitution be made the life of all negotiations, and the means employed be open, plain truth, the people will listen in both sections and a new era will commence. The administration can now offer such terms as will disarm all animosity and begin a restoration of old-time concord, peace and prosperity. Will this be done? For the sake of humanity and the welfare of our common country, we devoutly hope so. Let us have practical efforts in this hour of triumph, if we really wish for peace and the restoration of the Union. The people are in earnest; let our rulers be honest.

WHO OPPOSE PEACE?

There are two classes of men who stand in the way of peace—and both have influence with President Lincoln. The first are the fanatics—the political madmen—who, for the sake of having their negro equality theories fully tested, are willing to have the war continued in the most bloody form. These are aided and abetted to a certain extent by another wing of the Republican party. Many of the leading men of that organization, while not willing to grant the negroes entire social equality, are anxious that he should be allowed to vote. They are perfectly sure that nothing can prevent them from being hurried from office so soon as the war is over, unless in the meantime they can confer the right of voting upon the negro.

But there is another very large and influential class: those who are making money out of the war, either directly or indirectly. In numbers they embrace a large portion of that party; and by their collective exertions create the atmosphere in which Mr. Lincoln lives, and moves, and has his being. Ninety-nine out of every hundred men with whom the President converses from month's end to month's end, are persons growing or already grown wealthy from profits made out of business created or fostered and cherished by the war; or they are such as are living out of the federal taxes and loans. They are manufacturers, contractors, shoddyites of all classes and descriptions, and Government officials. Combined they constitute a vast and powerful body. Of course they are all devotedly loyal, after the fashion of these days, and utterly opposed to offering any terms of peace to the South.

The fanatics who constitute the first class precipitated the war upon the country; both classes desire its continuance. What does it matter to them how much the people suffer. Neither fanaticism nor avarice know what mercy means. The one would help to crush the lives of millions beneath the juggernaut of war to gratify its malignant hate; the other would gladly continue to distill the blood of the people into gold, with which to fill its craving coffers.

In the ore or the other of these two classes are to be found all those who oppose the offering of fair terms of adjustment to the South. How long will the people consent to suffer and bleed, that fanaticism and avarice may be gratified? Is it not the vilest mockery in the world for any people to call themselves free, while all they hold most dear is made to depend upon the caprices of a set of fanatics, or the avaricious desires of those who are sowing money out of their country's misfortunes, and growing rich upon the miseries of the people?

It is an outrage upon the white Union veterans, who did all the hard fighting in front of Petersburg, and compelled the evacuation of that place and the abandonment of Richmond by the rebels, to say that the rebel capital was captured by the negro troops—as a number of Abolition newspapers were saying on Tuesday. What makes the matter more of an insult to the white troops, is the fact that it is not known what troops Gen. Weitzel had with him. They only suppose that he took the 1st division of the 25th Corps—Gen. Wilder's negro division. It affords many Abolition politicians immense satisfaction when they can steal the laurels from the brows of brave Northern white soldiers to decorate the grizzled occupants of their colored pants.

The great collapse of 1857 was caused by an inflated currency, which at that time amounted to two hundred and fifteen millions. At the present we have a circulating medium of seven hundred and fifty millions; more than three times the circulation in 1857, when all the States were included. If we include the State Bank circulation, the paper issues of the country would make a grand aggregate of over nine hundred millions. What then may we expect when this immense bubble bursts? We are fast nearing a lee shore with breakers ahead, and our advice is to take heed. There is entirely too much canvas spread to the breeze, and the storm is surely coming.

The jolly Senators and favored citizens who went down to Savannah, Charleston, Fort Monroe, and all around, in the United States steamer Fulton, Captain Wicken, at the government's expense, have expressed their thanks to the captain for bringing them back. The Boston Post says this is more than the people will do who are taxed to pay for their frolic.

The Louisville Democrat says: The Cincinnati Gazette breaks out in wrath against Andy Johnson, and demands that he resign. Oh, no! don't let him resign. We have tried the peace policy; let's try it again, and see if it will do better.

THE GREAT COST OF TRAVELLING.

It seems that travelling has become a very costly business these times—especially for members of Congress, who are invariably provided with free railroad passes. Notwithstanding their free passes, it costs the Government an immense sum to get our "loyal" lawmakers to Washington and back home again. The "loyal" correspondent of the "loyal" Cincinnati Gazette has been looking over the books at Washington, from which he gathers some interesting items. For instance, Senator Sherman, who lives at Mansfield, Ohio, has drawn from the Treasury \$530.40 to pay his fare to Washington, when an ordinary traveller—who pays his way—could get there for about \$25. William Johnston, a member of the House, who lives in the same town, manages to get there for \$440—ninety dollars and forty cents less than the pure and honest Sherman!

The immaculate Jim Lane lives at Lawrence, Kansas—if he can be said to live anywhere. He comes to Washington by the nearest travelled route, and swears it costs him two thousand one hundred and sixty dollars (\$2,160) to make the trip! The Representative from the same town has only check enough to swear to twelve hundred and seventy-three dollars and sixty cents, (1,273.60), so that Jim outlives him eight hundred and eighty-six dollars and forty cents, (886.40), which is a mere peccadillo for the Kansas rascal.

Senator Pomeroy, of Kansas, lives at Atchison, about fifty miles nearer Washington than Jim Lane, but it costs him precisely \$2,160 to get to the Capitol. The Representative who lives at Lawrence gets as heavily to get there as it does to come to Washington by the nearest travelled route?

Racine, Wisconsin, is only about sixty miles from Chicago, and the whole distance to Washington can be traversed by a traveller—without free railroad passes—for about fifty or sixty dollars, refreshments and bibbles, of the best close, thrown in. It seems, however, that Senator Doolittle requires as much as Jim Lane, viz: \$2,160! If wearing twenty-one hundred dollars into one's pocket is not stealing—what is it? The cost of getting Senators Grimes and Harlan from Iowa has been noticed in a previous article. Their bills were also enormous.

These are some of the facts gathered from the record by the correspondent alluded to. He called at the proper office for more, but was told that "they were constrained to regard the accounts of the Senators with the Government, left in the hands of officers of the Senate, as private" and no more, for the time being, were to be had. It is thus clearly evident, remarks the Patriot & Union, that not only have many—perhaps all—of the self-styled loyal Senators unlawfully sworn public money into their pockets; but other officers in the public service have conspired to conceal the fact from the knowledge of the people. Should the people, or their representatives, chosen from a party adverse to the one now dominant, ever succeed in gaining access to the public records, such a history of fraud, corruption, and public plundering will be disclosed as has hardly been dreamed of in the wildest fancy. In view of this fact, it would not be wonderful that, in such a contingency, the mass of such recorded evidence would be found mutilated or destroyed. If not destroyed, there are thousands of plunderers who would find it necessary to make a sudden and unannounced trip to foreign parts, to escape popular indignation, and condign punishment.

It appears from the statement made to the Senate on the 6th of February, by Hiram A. Risby, agent to purchase products of insurrectionary States, that eight hundred "favorites of the Administration" have received exclusive privilege from the Treasury Department to purchase and get out from the South seven hundred and sixty thousand bales of cotton, forty thousand boxes of tobacco, nineteen thousand barrels of rosin, thirty-five thousand barrels of turpentine, twenty-three thousand barrels of tar and pitch, and two millions feet of lumber. The Albany Knickerbocker wants to know what these friends and relatives of Mr. Lincoln—Lamon, Sweet, Haskell, Camp, Greeley's friend, and others—have done for the country, that they should have such special privileges granted them? None of the special privileged class have risked either life or limb, nor have they in any way "supported the Government" except as howlers for "vigorous war" or no compromise. The Boston Advertiser knows of "one cotton contract of one hundred and fifty thousand bales, given to a prominent official resident in Washington, and sold out to parties in New York at one dollar and a quarter per bale. Knock off the odd quarter for expenses in one way and another, and it gives the official and his partners one hundred and fifty thousand dollars for the profits of the operation!" And this is "loyalty," of the modern Abolition school! The Lord deliver the country speedily from such "loyalists."

The recent New York Elections.—The vote upon the Constitutional Amendment, just rejected by the people, shows an adverse majority by tens of thousands, although extra means were taken to secure its passage. The Town Meetings held in that State show a Democratic gain of seventeen towns over last Spring, and a much larger gain over last Fall. They show, says the Albany Argus, the popular majority to-day to be with the Democratic party, by over 20,000. The indications are auspicious for the future.

The Democrats of Syracuse, New York, are feeling very well, having elected Capt. Steward, Mayor, and the whole Democratic ticket. Last year the Republicans carried the city by nearly as great a majority as the Democrats now have.

The Democrats have carried Nashville and the radicals St. Louis.

A poor boy not yet sixteen, was shot to death, last week, in the Army of the Potomac, for desertion. He had been the victim of a substitute broker, in New York, and was only a child physically and mentally.

Who will deny the conscience of those who participated in his sentence, or permitted it to be carried into effect, having the power to disapprove or to nullify it?

TERRIBLE CALAMITY.

Burning of a U. S. Transport—Over Five Hundred Lives Lost.—The United States transport Gen. Lyon, with nearly 600 souls on board, was burned off Cape Hatteras, on the 31st ult., involving a loss of over 500 lives—some 35 or 40 persons only escaping. One of the survivors furnishes the following particulars to a New York paper:

There were on board the steamer General Lyon, besides the officers and crew, two hundred and four men and eleven officers of the 56th Illinois regiment, who had been mustered out of service and were on their way home, their time of enlistment having expired; sixteen men of the 3d Pennsylvania artillery; one hundred and fifty-seven escaped and paroled Union prisoners; sixty-seven male refugees, and fully one hundred refugee women and children, on their way North. Besides these were two commissioned officers and eighteen enlisted men of the 25th Corps, acting as a guard, making in all rising six hundred persons on board, of whom the small number mentioned above is probably all that were saved, the sea rolling so high and the steamer being so near the line of breakers that it was impossible for the unknown schooner mentioned in the New York Herald to have SPARKLING AND BRIGHT.
BY CHARLES J. HOFFMAN.

Sparkling and bright in its liquid light,
Does the wine of our goblets gleam in;
With hue as red as the rosy bed,
Which a bee would choose to dream in.
Then fill to-night, with hearts as light,
To love as gay and fleet as
As bubbles that twirl on the beaker's brim,
And break on the lips while meeting.

Oh! if I might arrest the flight
Of Time through life's dominions,
We here a while would now beguile
The graybeard of his plidions.
To drink to-night, with hearts as light,
To love as gay and fleet as
As bubbles that twirl on the beaker's brim,
And break on the lips while meeting.

But since Delight can't tempt the night,
Nor fond Regret delay him,
Nor Love himself can hold the elf,
Nor sober Friendship stay him,
We'll drink to-night, with hearts as light,
To love as gay and fleet as
As bubbles that twirl on the beaker's brim,
And break on the lips while meeting.

There is now residing in the town of
Caledonia, Columbia county, Wisconsin, a man
named Joseph Grele, who is supposed to be
the oldest man in the world. He was born in
Detroit, of French parents, and the record of
his baptism shows that he is 139 years old.—
He was first married in New Orleans, 109 years
ago, and is now living with a daughter by his
third wife, who is over 70 years of age. He is
still active; is able to chop wood, and to walk
several miles.

Our new hero, General Terry, changed
upon his great feat, by accident. It is said
he was at Gen. Grant's headquarters the day after
the news of Butler's withdrawal had been
received, and in conversation with Gen. Grant,
said: "I think Gen. Butler could have taken
the fort."—"Do you?" said Gen. Grant; "then
go and take it yourself." And he was forth-
with put in command of the expedition.—

Captain to the Public:—There was, "once
upon a time," an old puffer Down East, of
whom all thea, far and near, were at once
charged, when any loss was discovered. The
old fellow bore the universal "onus" patiently
for a time; but finding that in some instances
he was suffering for the sins of others, he is-
sued a Caution to the Public in the usual form:
"I hereby forbid all persons, from this date,
to steal on my account and risk. I am no
longer accountable for their trespasses, as I
have more than I can account for of my own."

An "idea modeler" writes: I was teaching
in a quiet country village. The second
morning of my session I found leisure to note
my surroundings, and among the scanty furni-
ture I espied a three-legged stool.
"Is that the dunce-block?" I asked of a lit-
tle girl of five. The dark eyes sparkled, the
pupils dilated, and the lips quivered out:
"I guess so, the teacher always sits on that."
The stool was unoccupied that term.

"Sir," said a sturdy beggar to a benevo-
lent man, "please to give me a quarter. I am
hungry and unable to procure food. The
quarter was given, when the beggar said:
"You have saved me from something which I
fear I will yet have to come to."
"What is that?" said the benefactor.
"Work," was the joyful answer.

The Sue Canal, which has been six
years in constructing, is measurably com-
pleted. It connects the Mediterranean and Red
Seas, and is 90 miles long, 40 feet wide, and
four feet deep; but is expected in due time to
reach a width at the surface of 300 feet, and
to attain a depth of 20 feet.

An extraordinary instance of determi-
nation and endurance has just occurred in the
prison of Acaia, in Spain. A man named Puelis,
condemned to death for murder, in his dread of
the garrote, determined to starve himself to
death. He repeatedly refused all food, and on
the 12th day expired from exhaustion.

Parian society has been agitated by
the death of a young lady of rank and fashion.
On a post mortem examination it was found that
her disease was to be ascribed to tight lacing.
Her stays had forced three of her ribs into her
liver.

The United States Senate has appropri-
ated ten thousand dollars for the purpose of
procuring a marble bust of the late Chief Jus-
tice Taney, to be placed in the room of the
Supreme Court of the United States.

The past winter has been the longest
and coldest one that has been experienced for
many years. The Ohio and Erie canal has
been closed by ice for four months. The lake
has never occurred since it was constructed,
thirty-two years ago.

Some drunken fellows in a house near
Corvinton, Ky., a few days ago, poured liquor
on one of their companions and set it on fire
"for fun." He was too much affected by
drunk to help himself, and was so badly burn-
ed that he died.

It is found that women make the very
best clerks for the electric telegraph. The
only difficulty is to prevent each young lady
at either end of the line from having the last
word.

The first well in the Pennsylvania oil re-
gion was sunk in 1859. On the 28th day of
August the first vein of oil was struck at a
depth of sixty-nine feet four inches from the
surface.

Gov. Blaisdell, of Nevada, is six feet
four inches in height. When the Legislature is
not in session, they use him for a telegraph
pole.

The Philadelphia Navy Yard swiftness
have been made to disgorge seventy thousand
dollars.

Lessons should be short. Long lessons
are invariably to real progress in study.

Considerable prospecting for petroleum
is going on in several parts of California.

A servant girl in Meadville had a
boss who enlisted in the army. Previous
to leaving home he made her a present of
a third interest in three acres of land on
Oil Creek, at the right token of his regard.
This small tract has recently been sold, and
the lady shares of it is \$40,000. The Journal
says: "It doesn't put on airs, and mar-
ries the soldier boy when he comes back
from the war, the story will be finished in
the good old fashioned way, and we will
only partly enjoy ourselves."

Universal Clothes Wringer.
SELF-ADJUSTING AND ADJUSTABLE,
WITH COG-WHEEL REGULATOR.
SHEARS & BURLER.
GETTYSBURG, PA.
From innumerable recommendations, we
offer the following:
Letter from Mr. Henry Ward Beecher, in 1861.
I am most happy to speak in the very high-
est terms of the "Universal Clothes Wringer."
The hardest part of "washing-day" work is,
in my opinion, the wringing; and the inventor
of this machine may have the satisfaction of
feeling that he has changed one of the most
tollowing parts of woman's work into a very
attractive amusement. The laundress looks
upon it as a great blessing. I look upon it as
among the most useful articles in the house.

FOUTZ'S

CELEBRATED
Horse and Cattle Powders.

These Powders will strengthen the Stomach and Intestines, cleanse them from offensive matter, and bring them to a healthy state. They are a sure preventive of Lung Fever, and a certain remedy for all Diseases incident to the Horse, such as Glauco, Yellow Water, Distemper, Founder, Heaves, Coughs, Fevers, Appetite and Vital Energy.

In poor, low-spirited animals, it has the most beneficial effect. The use of them improves the wind, strengthens the Appetite, and gives to the Horse a fine, smooth and glossy skin, thus improving the appearance, vigor and spirit of this noble animal.

FOR MILCH COWS.
The property this Powder possesses in in-
creasing the quantity of Milk in Cows, gives it
an importance and value which should
place it in the hands of every person keeping
a Cow. By actual experiment it has been
found that it will increase the quantity of Milk
and make it firm and sweet. In fattening Cattle, it gives
them an appetite, loosens their hide and
makes them thrive much faster.

HOGS.
In all Diseases of the Swine, such as
Coughs, Ulcers in the Lungs, Liver, &c.
By putting from half a paper to a paper of these
Powders in a barrel of Swill, the hog will
eat the swill with pleasure, and thereby pre-
vent the disease. By using these Powders the hog
Cholera can be prevented.
Price 25 cts. per Paper, or 5 Papers for \$1.
